To: Team Captains, Special Program Managers and Advisors, and Team Coaches

Greetings Varsity Scouts and Scout Leaders! You are about to participate in Varsity Scouting's most elevating activity for the year 2008. If you have planned right, you are about to have a mountain top experience that you will remember forever. It will help to culminate the last years' worth of Team activities and will guide you and your Team through the upcoming year. I commend you for your choice to participate in **Operation On Target** this year.

There are over 70 Teams participating in this year's activity. This is the biggest year ever for Arizona On Target! Team will be on Arizona peaks from Hayden Peak in the northwest to Mount Graham in the southeast. That will cover most of the state! Every Team should have ample opportunity to send and receive signals from several peaks. Please make every effort to be at your appointed location and be ready to go at 9:00 am. For some of you, that means a hike beginning at daybreak! Last year we had some Teams trying to make contact with Teams that had left early, so plan to stay until noon. Don't forget to finish up with a "reflection". This is a great opportunity to contemplate on your life, and plans for the future.

The following items are included in the packet:

1. The current list of peaks and teams with associated radio call signs and cell phone numbers. This list will be updated one more time on Thursday night, please download this from <http://ontarget.mesavarsity.org> before you leave for the activity so you know where all the teams are located.
2. A "nuts and bolts" list of how to do the **Operation On Target** activity
3. An **Operation On Target** after action report. We are keeping a copy of these reports to help in the coming years. Please fill it out and get it back to Bob or me as soon after the activity as possible.

Operation On Target - A Varsity Scout Mountain Top Experience!

Remember also that On Target is a Gold Passport Activity for the 2009 Rendezvous and you must fill out an After Action Report and have it turned in by 12-31-08 to qualify.

4. A list of reflection suggestions and ideas to culminate the activity
5. This year we have one letter to be used during the reflection following the signaling. This VIP letter is from Bro. Dean R. Burgess from the LDS Church General Young Men's Presidency. He is a great leader and a true supporter of Varsity Scouting. When we were discussing this letter with him, he wished he could be here to participate. A short bio of Pres. Burgess is included.
6. A letter to Ham Radio Operators telling them the primary and secondary frequencies for the activity is also included. Please communicate with and send this radio plan to the radio operators as soon as it is possible so they can program their radios and be ready for the activity.

Don't miss the opportunity to teach your Team about being "On Target" in their personal lives. Please do not come down from the mountaintop until you have spent time together with the Team to reflect on the ideals of Scouting. **Operation On Target** is the perfect opportunity to review our **Duty to God and Country**, our **Duty to Others**, and our **Duty to Ourselves**. Use this time to make sure the Team is On Target personally and collectively!

I hope you have a safe, fun, and successful activity this weekend. Be aware of the rules of the game we are playing here. Adhere to the BSA's Wilderness Use Policy while you are in the field. You will find it on the Tour Permit you file for this activity. Get permission to cross any private lands and to climb any Lookout Towers. If you do your best you will have a wonderful time. Fill out an after action report and send it to me or bring it to huddle next time. We will try to make it worth the effort to fill it out. I hope you have bright sunshine all day long!

Michael D. Heaton
Operation On Target Coordinator

*The coward never starts,
The weak die on the way,
Only the Strong come through.*
- Vaughn J. Featherstone

"An annual "On Target" day is just the perfect climax and exhibition of a year of character building, setting goals, making ethical decisions, and creating a national brotherhood. What better climax than a recognition and reaching out to fellow Scouts and topping it off with a spiritual experience. Not only do we flash our mirrors to the world saying Varsity Scout is on target, but we look into those mirrors one by one and say to ourselves, 'Am I On Target?'

Boy Scouting has the Jamboree, Exploring has the Olympics, and Varsity Scouting has Operation On Target! -- A potential program to dwarf both the others. What an opportunity to provide Varsity Scouting a common bond, a universal tie nationwide."

Boyd Ivie

OPERATION *ON-TARGET*

NUTS AND BOLTS

1. **A vital resource** is the Operation On-Target Activity Chapter in the second volume of the new Varsity Program Features Books. Either order one from the Grand Canyon Council Scout Shops or pick one up at Huddle. It does a very good job of explaining the program.
2. **Spend time in weekly Team meetings making preparations.** Construct hand mirrors for each Varsity Scout to keep with him and practice. Spend time in weekly meetings constructing a larger signal mirror that is approximately 24" X 24". The Operation On-Target Activity Booklet contains instructions on making and aiming hand mirrors and larger mirrors.
3. **Pick a peak** wherever your team wants to go, and then send in the enclosed registration form as soon as possible. Please list your top three preferred peaks. Peaks are assigned on a first come, first served basis. The District and/or Council OT Committee will coordinate any duplications in peak assignments in the event that some other team has applied for the same peak and attempt to make sure that you won't be off somewhere by yourselves. Check the peak list and assignments page in this site.
4. **Get permission to use the tower** if you are going to one of the many peaks where there is a fire tower. Contact the local district forest ranger and gain access. Many of the peaks have a fire tower that increases visibility. Since the fire danger will have passed, (hopefully), it is important to discuss this with the forest service early so a ranger will be there to let you on the tower. It is also important to discuss any restrictions that may be at your selected peak.
5. **Know how to use a compass** to find the direction for each peak being occupied. It is important that the young men are comfortable with using their compasses.
6. **You will need to obtain good maps of the area where you are going.** One option is to use a **pilot's aeronautical chart** of the state for your compass work. A good one can be obtained at no charge from the Arizona State Department of Transportation, Aeronautics Division at their office in Phoenix or at any of the small airports in the area. The best maps for any of the National Forest areas are the **maps published by the US Forest Service for each of the forests.** These show the roads and trails. If you have to hike in a **topographical map** of the area around your peak will also be of great benefit. Get these at any good map store

7. **Make the activity fun.** Link in other activities with On-Target. Suggestions are backpacking to the peak, do a service project, or work on advancement.

8. **Review your resources** and arrange to have a HAM radio operator with you at your peak. This can enhance your success, giving you immediate confirmation of the signal your Team has sent. Check the instructions for the HAM radio operators. Signaling is from 9:00 a.m. to 12:00 p.m. on Saturday.

9. **A Mountaintop Ceremony is conducted** when signaling is complete. This is an excellent opportunity to discuss the importance of being On-Target in all aspects of their lives. This is an opportunity to have a meaningful Coaches Corner, present awards such as an Activity Pin, and discuss the young men's feelings through a reflection. Also, letters from prominent people have been prepared discussing the importance of keeping their lives On-Target. These letters will be available prior to the activity and should be read during the Mountaintop Ceremony.

10. **Prepare a time capsule** for the Team next year in conjunction with the Mountaintop Ceremony. Instructions for the time capsule are in the Team Resource Book.

11. **Appoint a historian to record the activities.** An important part of On-Target is to have a great story to tell. Those can be shared in a parent's night. A Flashback may be held where you will have an opportunity to compete in the Best Told Story contest. Be creative in presenting your story. Use pictures, videos, music, etc. It is most effective if the story covers all aspects of the activity from preparation to mountaintop.

12. **A Flashback** may be held in District Varsity Huddle in October. Awards may be presented for longest flash, largest mirror, etc.

13. **REMEMBER that this is a great opportunity for the Varsity Scout to grow personally.** Make sure the young men are involved in the planning and preparation.

If done with the right preparation the Operation On-Target activity will be meaningful and fun even if it is cloudy or it rains.

Reflection Ideas.....

THE REST OF "ON TARGET" ...THE MOUNTAIN TOP EXPERIENCE AND COACHES CORNER

Following the signal flashing and recording the event from your peak, you as the adult leader have the opportunity to create a memorable experience. This is a great opportunity for a reflection on the On Target experience and on life and our purpose in life.

Hold a Reflection and *create* a memorable experience!

One idea is that after you have eaten your lunch; take 20 minutes to share your thoughts on the creation of this beautiful earth and of the many blessings that we have been given by our Heavenly Father. Read aloud the creation and what our relationship is in the creation. What we are to know and what we are to accomplish while we live thru our mortal sojourn here. Express your inner feelings along with your love and concern for each member of the group.

- Ask for questions and points to be clarified.
- Ask a group member to offer a prayer of thanksgiving.
- Ask each member to ponder their life and their goals.
- Give each youth the letter that you received from his parents, that expresses, their love and esteem for them and how much they mean to their family, how they are an important part of their family and am willing to help out.
- After a few minutes of contemplating, have the group share their feelings with each other. Conclude with a word of prayer and have a safe trip home.

Another thought....

On-Target is an excellent activity that has many purposes but its main purpose is to increase a young man's commitment in his duty to God. This is primarily accomplished through the Mountaintop Ceremony following the signaling. The signaling is a discovery experience that is used in drawing parallels to other subjects. The signaling will be fun, but the real meaningful portion will be the reflection conducted by the Team Coach during the Mountaintop Ceremony.

The Mountaintop Ceremony should include the following:

1. Song and prayer
2. Present the On-Target Pin for each participant
3. Other advancement including merit badges

Reflection Ideas.....

4. Read letters from famous person and religious leader
5. Prepare time capsule memorabilia
6. Reflection
7. Coach's corner
8. Closing prayer

It is critical that the Coach be prepared to conduct an effective reflection. Attached, you will find various discussion points that can be used during the reflection. However, the Coach needs to be constantly observing the activities and how they can be discussed in the reflection. The Coach needs to know this information, but the reflection should not be a sermon by the Coach. Make every attempt to draw out these points from the young men. It is not necessary that they bring out every point. It is important that the parallels that are drawn are meaningful to them and that they feel the Spirit. **FOCUS ON WHAT THEY FEEL!**

Possible questions you can ask that will draw out their feelings are:

1. Did you have fun? Why?
2. Was it difficult to aim the mirror? When was it most difficult? Was there anything that you did to help you aim the mirror?
3. How did you feel when you saw the first signal from another peak?
4. If a hike was involved, ask them about the difficulty of the hike? How did they feel?
5. How do you feel being on top of this mountain? Do you remember how the Lord uses mountains with His people in the scriptures? Discuss.
6. What other aspects of this activity can you relate to the scriptures? (Light, signaling, etc.)
7. What was the purpose of this activity?
8. Any other questions that you feel are appropriate. If you are prayerful and prepared, you will be lead and guided to ask the right questions.

If the Coach is prepared, is observant of the activities of the weekend and conducts an effective reflection, the young men, and the Coach, will come closer to God.

Spiritual Parallels to LDS Principals Taught By Operation On-Target

1. Mountains - Holy Places of God
 - a. 1 Nephi 11:1 - Nephi is caught away in spirit to high mountain.
 - b. 1 Nephi 17:7 - Nephi is commanded to get into mountain to speak with Lord.
 - c. 1 Nephi 18:3 - Nephi goes into mountains often to pray.
 - d. Ether 3 & 4 - The Brother of Jared speaks with the Lord upon a mountain.
 - e. D & C 17:1 - Urim and Thumim given to Brother of Jared on mountain.
 - f. Moses 1:1 - Moses is caught up into mountain.
 - g. Moses 1:1-2, 42 - God speaks to Moses on mountain.
 - h. Mountains are physically closer to where God dwells, very clean places, secluded places, take great effort to reach.
 - i. Temples today are called the Mountain of the Lord.
2. Light - Light is what mirrors reflect to give signal.
 - a. 3 Nephi 12:16 - Let your light so shine... see your good works.
 - b. D & C 86:11 - The Lord's servants to be light unto Gentiles
 - c. D & C 103:9 - Saints sent to be Light unto the world

Reflection Ideas.....

- d. 1 Nephi 17:3 - The Lord will be your Light in the wilderness.
 - e. Light is a symbol of knowledge, truth and righteousness.
 - f. Area covered by mirror flash is large and has tremendous range.
 - g. Brilliance of mirror flash – Brilliance of God’s personal Being. Relate to Joseph Smith's first vision and his description of God.
3. Ensign unto the Nations – Flag or banner (Example to the world)
 - a. 2 Nephi 11:12 - The Lord will lift up an Ensign to the Nations.
 - b. D & C 64:42 - Zion to be an Ensign unto people.
 - c. Hymn - High on the Mountain Top (See lyrics)
 4. Visual and audio signaling. Prayer
 - a. The Team’s outgoing signal is like a prayer to God. The return signal is like God answering our prayers.
 - b. In order for the communication to be effective, the sender must be aimed properly (focused). In order to see the signal, the Team must be looking in that direction to see the light. Sometimes we are looking in a different direction and miss the signal (or answer to prayer). Sometimes we can’t see the signal because the haze covers it.
 5. Climb to Highest Peak Goal Attainment
 6. Team Work, Priesthood brotherhood, Cooperative effort
 7. “On-Target”... Obedience to the Lord’s commandments allows us to be in tune with the prompting of our Heavenly Father. We are in line with the Lord’s desires and programs.
 8. Using a mirror to reflect some of the sun’s light is symbolic of our using the Priesthood to reflect God’s power to do well in the world.
 9. The larger the mirror, the further the signal can be seen. The stronger our testimonies are, the more people we can influence for good.

Reflection Ideas.....

“Let Your Light Shine”

At a spectacular lookout point at Beaver Varsity Scout High Adventure Base, in Central Utah, an older Scout Leader recalled to his boys the following account.

“I remember as a boy scout, in 1926, climbing high above tree-line to the top of that distant peak right there, Mt. Delano, in a similar Operation, much like Operation “On-Target!” It was our nation’s Sesqui-Centennial Celebration of the Signing of the Declaration of Independence, then 150 years ago!”

“Someone conceived of the idea of symbolically spanning the message of independence across our great land by assigning groups (mostly Boy Scout Troops I suppose) to peaks and vantage points in a long line all across the United States from Boston to Los Angeles. Then after dark, at an appointed time, a bonfire would be started in Boston and as soon as it was seen by the next troop, they’d light theirs, and so on.”

“I remember carrying my share, a 4 foot length of telephone pole to the top. Why, we made our fire so big that the boys on Timpanogas saw ours so brightly that they lit theirs before those on Mount Nebo in between even got theirs started!”

“I’ve often thought about that. If we let our light shine so brightly, perhaps our good example will make up for others who maybe are a little slow of doing what they ought to be doing.”

“Rise Above the Rest”

The story is told of King Louis XIV’s son, the prince, who was kidnapped by a band of evil revolutionists. They took the lad and over many months exposed him to every conceivable vice. They tempted him with sumptuous, rich foods and with wine, and liquor. Their language was filthy and profane. They told him dirty stories to pollute his young mind. They tempted him by making women of loose moral character available for his every desire. There was nothing that the mind of man can conceive, which these men were no prepared to indulge him.

Many months passed, he never compromised one standard. They were baffled and astonished. They said, “Why? Why have you not taken advantage of all these luxuries, food, liquor, loose women, etc?” He stood before them fair and tall, head erect and replied; “I cannot do what you ask, for I was born to be a king.”

You young men were born to be kings and gods. Always rise above the rest; walk in high places stand on holy ground and walk uprightly before the Lord.

What if On Target day is cloudy? Having alternate plans

On Target is held on the third Saturday of July (and September in GCC) every year. This particular date gives us the best chance of clear skies and favorable weather conditions. During the many years that I have been involved with On Target, only once has cloudy weather made signaling with the mirrors impossible. All is not lost if inclement weather occurs on On Target day, however. Following are some thoughts concerning alternative plans if clouds prevent signaling:

The Mountain Top Ceremony (MTC) can still be held, making use of the letters from parents and church leaders. The symbolic nature of scaling a mountain as it relates to succeeding in life can be discussed. Objects can still be placed in a Time Capsule. Feelings and/or testimonies can still be shared. The young men could write letters to their parents, in response to those they received from their parents.

The ham radio operators can still communicate with each other. An in-depth exposure to amateur radio could be meaningful. The ham could discuss propagation, types of radios, how to obtain a license, Morse code, and other aspects of hamming.

Work could be done on merit badges such as Backpacking, Nature, Wilderness Survival, Camping, Hiking, Camping, Orienteering, etc. Varsity Letter activities could be carried out.

The scouts could perform service in the area of your encampment. Trail improvement, trash pickup and removal, the building of a mountaintop cairn, or erosion control are some possibilities.

Mountain games or activities could be held, such as Steal The Flag, Stick It To Me, orienteering, or map and compass work.

A mountain-top Court of Honor could still be held, with the awarding of merit badges or other accomplishments.

In short, a cloudy day does not doom this activity. At the very least, you will have enjoyed a wonderful camping experience in the mountains, having had an opportunity to share feelings and experiences in a beautiful setting. Be prepared with a "PLAN B" in case inclement weather occurs. We all need to exercise our faith and prayers that we might be blessed with clear skies and smog-free valleys on ON TARGET morning!

(Our thanks to Michael Taylor and his OT web site for the Utah Parks Council at <http://members.home.net/mdtaylormd/ontarget.htm>).

Operation ON-TARGET!

Radio Plan

DATE: September 1, 2008
TO: All Ham Radio Operators supporting the 2008 Operation On-Target.
FROM: Gary Hinton AC7R, Operation On-Target Radio Coordinator
Mike Heaton KD7YIE, Operation On-Target Coordinator
RE: 2008 Ham Operator Communications Plan

Once again thanks to all of you for volunteering your help for the 2008 Operation On-Target Mountaintop mirror signaling experience. Gary Goetz, our long time Net Control will again be helping us this year as the Net Control on Mt. Ord.

Because of a change in the Greens Peak repeater, and the linking mechanism, the Mt. Ord repeater is now linked from Greens Peak to Flagstaff to Mt. Ord to Pinal, giving us coverage to the north, east and south.

We will also have a Control Operator for the Phoenix Metro area and the West side, on White Tanks. He is Barry Hoffman, K7BLH. All Phoenix area and West side peaks should be checking in with him, not Mt. Ord.

We will use the following 2-meter frequencies:

147.360 + PL 162.2 Mt. Ord	East Side Hailing Frequency – Tonto Basin
147.140 + PL 162.2 Mt. Elden	Flagstaff Area
147.200 + PL 162.2 Pinal	Southeast Side Hailing Frequency
147.380 + PL 79.7 White Tanks	West Side and Phoenix Metro Area Hailing Frequency
146.680 – PL 162.2 Smith Peak	West Side Hailing Frequency - backup
146.720 - PL 162.2 Greens Peak	Northeast Side Hailing Frequency

If you have an FRS radio, bring it and tune to Channel 7 with a CODE 0. After you establish communications on the FRS Radio, then switch to a different channel with a PL Code.

The operational time is from 9:00 a.m. to 12:00 noon on Saturday, September 20, 2008. We would like to have a quick check-in on Friday the 19th at 8:45 PM on the Mt. Ord linked repeaters to check out our equipment. We realize not everyone will be able to check in at this time, as some units will be camping overnight in places that may not be able to hit the repeater. Please try from wherever you are so we can work out procedures. On Saturday morning we would like to establish communications with everyone on the repeater frequencies starting around 8:30 a.m. to allow time to work out any glitches that may arise and to make sure our radios are operable. Try checking in on the FRS Radios also to see if they will work.

Mt. Ord, being in the middle of the Tonto Basin, is always a very busy mountaintop. It is recommended that at least 2 radio operators be at this site to handle all of the communications and flash coordination. One could handle the net freq while the other is on simplex.

The description that follows is for the Net Control operation on the Mt. Ord repeater:

As we have done in years past, for this activity we will begin on a common "hailing" frequency to establish

Grand Canyon Council Operation On-Target

our initial contacts with the other mountaintop ham operators and their associated Varsity Teams. The Net control operator will monitor the repeater frequency to control the net. His responsibility will be to coordinate the contacts, try to keep order to our communication, and relay any information between stations that may not be in range to make contact directly.

Frequency	Type
146.48	Simplex
146.52	Simplex
146.54	Simplex
146.56	Simplex
147.46	Simplex
147.52	Simplex
147.54	Simplex
147.56	Simplex
Note: 146.52 is the National Simplex Calling Frequency	

Once you have established radio contact with another operator on the repeater and want to try to establish mirror contact, you will be directed to one of the following simplex frequencies shown in the following table.

After you have confirmed the mirror flash with the other mountain peak, then QSY back to the repeater frequency for your next radio contact. Then repeat the process again.

Once again this year we are trying to improve our way of contacting the peaks that are usually very busy. It is a method of regionalizing the contacts with those that they should be able to contact. The plan is described below "**Regional Radio Op Plan**". Please give it a try. We are always interested in making it better. If you have an idea on how we can to this, please let us know!!

NOTES AND TIPS

1. As you can see from the list, there are several teams that do not have a ham radio operator. If you know of anyone that would be willing to participate, please call or email Mike Heaton or Gary Hinton. Their contact information is below.
2. Every team has a different skill level in the use of the mirrors. So, the radio coordination will be extremely important, especially for some of the longer distances. Your help is appreciated to help each team make as many successful contacts as possible.
3. *Don't forget that the repeater and simplex frequencies are open to the ham community and are NOT dedicated to our exclusive use. Please be kind and considerate to other traffic, especially on the repeaters.*
4. Involve the boys by letting them handle the radio as well. You are the control operator, but you can let them do the speaking. There may be a future ham radio operator in the team.
5. This is an annual event. We really appreciate your participation and hope that you will be available next year. This is a great activity and is getting bigger and better every year, thanks to you.

Regional Radio Op Plan for Operation On Target!

The Teams participating in On Target will use a suggested repeater for each region. The Teams surrounding a regional repeater would belong to that region and focus their efforts on Teams in their region. Teams around the White Mountains area would be in the East region and use the Greens Peak Repeater (146.720 - PL 162.2). The Central region would be handled by Mt. Ord (147.360 + PL 162.2). The Southeast region could be handled by a repeater on Pinal Peak (147.200 + PL 162.2). The Phoenix Metro Area and the West region would be handled by a repeater on White Tanks (147.380 + PL 79.7) with Smith Peak (146.68 - PL 162.2) as a backup. If we get a lot of Teams way down south, a South region could be established around Mt. Lemmon (146.66 - PL 110.9) or (147.22 + PL 110.9).

Teams should focus on the Teams in their region but could also try to contact those that they may be able to see outside of their region. These 'others' would require them to contact those peaks on their region repeater.

Grand Canyon Council Operation On-Target

This may sound like more coordination, but if we focus on the list for each region, each team could concentrate on this list of peaks and not worry about others until those within their region have all been contacted.

Brother Dean R. Burgess Short Biography

Dean R. Burgess **First Counselor, Young Men General Presidency**

Brother Dean R. Burgess, 59, was born to Reid and Ethel King Burgess in Alpine, Utah, and grew up working in the family-owned mercantile store and on their 20-acre farm. His parents taught him the value of family, hard work, and the principles of the gospel.

After returning home from serving a full-time mission in Brazil, Brother Burgess completed his education at Brigham Young University in business management. He is a construction supervisor and home builder. He returned to Brazil in 1997 to serve as president of the Brazil Belo Horizonte East Mission. His other Church service includes counselor in stake presidencies, stake Young Men president, bishop, and high councilor. He currently serves on the National Boy Scouts of America Advisory Council.

Brother Burgess is married to Annette Christensen Burgess, and they reside in Sandy, Utah. They are the parents of five children.

THE CHURCH OF
JESUS CHRIST
OF LATTER-DAY SAINTS

YOUNG MEN

50 E. North Temple St. Rm. 2088

Facsimile: 1-801-240-5767

September 20, 2008

Dear young men of the Aaronic Priesthood,

Congratulations!! You did it! You made it to the top of your mountain! I wish that I could be standing by you and look at the magnificent views and sights before you. The view and feeling from the “top” of a mountain is only reserved for those that keep going, work hard, and make the honest effort to finish their goal of getting to the top. That is special!! Congratulations to each one of you in reaching your goal and reaching the top. I am happy and proud of each of you!

President Thomas S. Monson has challenged you and all of us to become “finishers” in our lives. We need finishers or young men and individuals that set goals and complete them. They finish what they start to do – just like you young men as you prepared to hike this mountain with the goal to reach the top so you could signal to others and the world that you made it!!

In life each of you will make goals or have tall mountains to climb. They will be goals that will prepare you for the future. They will help you face the challenges of life and make you strong to become steadfast in becoming successful as a husband, father and leader. You have great support and help to accomplish these goals from your parents and family, friends, and Priesthood leaders. Please listen and follow their wise counsel.

Don't be afraid to do hard things. You are a special group and generation of young men. You have been saved to live today at this time, when challenges of the adversary are abounding everywhere you turn. These temptations can also be mountains to climb as you avoid and resist the evil temptations that come to you each day. You can do it! You have the ability and determination to accomplish anything you set your mind to do. You can become successful in living all of the standards and commandments that Heavenly Father has given to each of you. We find these standards in the “For the Strength of Youth” booklet. The prophets have told us that when “you keep these standards and live by the truths in the scriptures, you will be able to do your life's work with greater wisdom and skill and bear trials with greater courage.”

Always be true to your faith. Be true to your heart in doing those things and making choices that will strengthen you personally in spirit and mind. Be committed to the right. Have integrity and be honest in all that you do. Be trusted by everyone. Have the courage to stand tall, steadfast, and immovable in always doing good. (Mosiah 5:15)

You will gain experiences in your Priesthood service and your scouting to prepare you to become a great missionary. I know each of you have that potential and ability to do just that. President Monson has challenged each of you to “do your very best.” Not just your best, but your very best!!! Don't take “shortcuts” in life, but finish the task and the goals you set to do. Become that good student, great athlete, strong Priesthood brother and a young man of integrity.

I promise you that as you continue to climb mountains in your life, you will become better prepared for life. You will become who Heavenly Father wants you to become. You will be happy and you will be able to do many great things. We love you. We are proud of you and who you are. We pray for you to be strong and steadfast. We know you can do hard things in your life. May God bless you in all the good things you are doing.

Your friend and brother in the Priesthood,

Dean R. Burgess

1st counselor, Young Men General Presidency

Operation On-Target 2008 After Action Report

(Turn in following the activity on September 20, 2008. We will use the information to form a database for further reference describing the peaks in our system. This is also our record for the Rendezvous Gold Passport!! **You must have this form filled out and turned in on or before 12/31/08 to qualify!!**

General Information:

Team No. _____ Sponsor: _____ Captain: _____
Peak/Location: _____ Drive/Hike: _____ Car/Truck/FWD: _____
Hike In Dist.: _____ Hike Diff. Easy/Moderate/Difficult: _____
Trail Marked (Good/Bad): _____
Visibility (360°/270°/ 180°/ 90°/ Give Details) : _____
Peak Capacity/How Many Teams: _____ Recommend for next year? (yes/no): _____
Why or why not: _____

Detailed instructions on how to get to the actual site for signaling:

GPs Coordinates: North: _____ West: _____ Elevation: _____

Detailed instructions on how to get to the time capsule (if applicable):

Use of Mirrors:

On Look-out Tower: _____ Ground: _____ Both: _____
Need Two Setups? _____ Comments: _____

Access:

Open/Controlled: _____ Contact Name: _____
